

## Untitled Query Query Results

Your query returned 251 imaging results from 78 subjects. [View My Query \(/queries/16151/edit\)](/queries/16151/edit) or [Create New Query \(/queries/new\)](/queries/new)

- COBRE: 251 imaging results from 78 subjects

Note that some subjects have longitudinal data, some visits contain multiple imaging sequences, and some scans have multiple formats.

To review your query, please use the [View My Query \(/queries/16151/edit\)](/queries/16151/edit) link (the back button will take you to a blank query creation page).

### Download Package

- deprecated\_schizconnect\_metaData\_16151.csv ([/downloadable\\_files/15524](/downloadable_files/15524)) (81.6 KB, expires: July 20, 2022 at 10:20am Central Time)
- schizconnect\_COBRE\_images\_16091.7z.001 ([/downloadable\\_files/15497](/downloadable_files/15497)) (4.34 GB, expires: July 20, 2022 at 10:20am Central Time)

Please note that you will need 7zip (<http://www.7-zip.org/>) to extract the contents of 7z files. On a Mac or Linux machine, we recommend the p7zip (<http://p7zip.sourceforge.net/>) command line utility.

### Accompanying Information

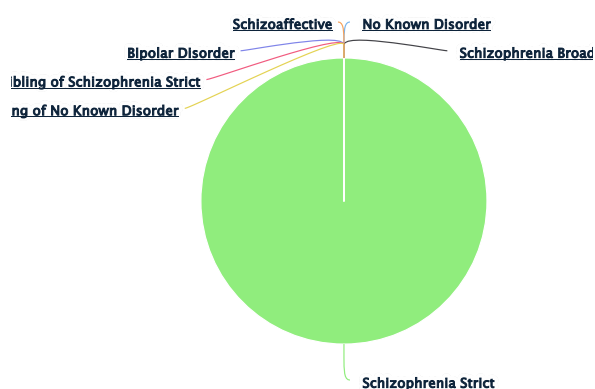

- COBRE\_Scan\_Information ([http://schizconnect.org/data\\_instructions/2/render\\_pdf](http://schizconnect.org/data_instructions/2/render_pdf))

NOTE: Some subjects may participate in multiple projects (e.g., projects with overlapping sites such as FBIRN/COBRE/MCIC/BrainGluSchi). You may download the COBRE/BrainGluSchi overlap list ([http://schizconnect.org/assets/BrainGluSchiCOBRE\\_common\\_subjects-22ee81fc3fdc1be1d1892f31365f8a89.csv](http://schizconnect.org/assets/BrainGluSchiCOBRE_common_subjects-22ee81fc3fdc1be1d1892f31365f8a89.csv)) and the COBRE/MCIC overlap list ([http://schizconnect.org/assets/MCICShareCOBRE\\_common\\_subjects-927923c00ebe9a88b87f9ba351e674d6.csv](http://schizconnect.org/assets/MCICShareCOBRE_common_subjects-927923c00ebe9a88b87f9ba351e674d6.csv)), but it is generally advisable to compare structural images/ROI volumes to detect repeated subjects across different studies. Note that the scans themselves are not duplicates - you essentially have multiple "timepoints" for these cases.

## Untitled Query Subject Breakdown
